SUMMARY

Backend developer with 4 years of experience delivering scalable, data-driven web platforms using Node.js, TypeScript and NestJS technologies. Specialized in deploying complex systems into production environments. Skilled in REST and GraphQL API interface, and building user-centric web apps and working with cross-functional teams, optimizing backend performance, and delivering business-focused features.

TECHNICAL SKILLS

- **Programming Language:** Node.js, Express, Nest.js, TypeORM,
- **Frontend:** Angular, JavaScript, Typescript, HTML/CSS
- **Database:** MongoDB
- **Cloud:** AWS, Docker, Kubernetes, Azure
- **Tools:** Git, Agile/Scrum, Jira, Confluence, TwinCAT 3, React

EXPERIENCE

Working Student Backend Engineer at Regtify (Remote, Cyprus) 11/2024 – Present

- Developed and maintained regulatory reporting modules.
- Implemented real-time notifications using WebSockets.
- Developed data ingestion pipelines for regulatory data processing.
- Optimized SQL queries to improve application performance.
- Implemented hash-based sharding to improve database scalability.

Full Stack & Cloud Engineer at Regtify (Remote, Cyprus) 01/2022 – 10/2024

- Developed and maintained multi-tenant regulatory reporting platforms, supporting over 500k API requests daily.
- Improved application performance by 30% through service optimization, state management, and lazy loading.
- Designed scalable REST APIs and async processing workflows.
- Implemented CI/CD pipelines using GitHub Actions, Docker, and AWS ECS, enabling automated deployments.
- Developed serverless solutions with AWS Lambda and managed scalable data workflows using DynamoDB and Amazon S3.
- Collaborated with cross-functional teams including product owners, QA engineers, and developers in agile delivery cycles.
- Used Jira for sprint planning, task tracking, and development workflow management.

Software Developer at Aimviz (Karachi, Pakistan) 09/2020 – 12/2021

- Established unit and E2E testing frameworks.
- Integrated Restful API services
- Redesigned legacy web apps using Angular, enhancing performance and UX for 80k monthly users.
- Created secure API for 3rd-party integrations and developed async background jobs using Redis.
- Migrated large-scale frontends to Angular + Typescript, boosting code maintainability by 65%

Internship at Source Design (Karachi, Pakistan) 03/2020 – 08/2020

- Redesigned legacy web apps using Angular, enhancing performance and UX for 80k monthly users.
- Created secure APIs for 3rd-party integrations and developed async background jobs using Redis.
- Migrated large-scale frontends to Angular + TypeScript, boosting code maintainability by 65%

EDUCATION

M.Sc. Computer and Systems Engineering 10/2024 – Present

PROJECTS

Regulatory Reporting (<https://ifr.regtify.net/>)

- Developed automated data pipelines to transform and aggregate reporting datasets.
- Implemented role-based access control and audit logging to support compliance and security requirements.
- Developed automated data pipelines to transform and aggregate reporting datasets.

Shipping e-Commerce (<https://app.smoothparcel.com/>):

- Designed microservice-friendly architecture for shipment processing and notification handling.
- Deployed and managed cloud infrastructure on AWS ECS with Docker-based environments.
- Integrated third-party courier APIs and payment gateways to support real-time shipping operations.

Property Management (<https://propertease.com.au/>):

- Designed secure APIs for user authentication, property operations, and document management.
- Improved platform reliability by implementing monitoring, logging, and error-handling strategies.
- Contributed to architecture discussions and technical planning for scalable feature delivery.

Digital Lottery System (Apexdlc):

- Developed secure backend services for lottery ticket management, draw processing, and transaction handling.
- Implemented payment integrations and wallet management systems with transaction validation.
- Improved maintainability by writing modular TypeScript code and reusable service components.

CERTIFICATIONS

AWS Certified Cloud Practitioner
ACCP Pro (Aptech)

Node.js (HackerRank)
JavaScript (HackerRank)
